-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

1. Claims 1-19 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. With regard to the casting anchor, claim 1 requires "positioning a casting anchor within the test socket, the casting anchor being engaged with an alignment member extending out through a hole in the test socket; introducing a molding material into the test socket so as to at least partially encase the casting anchor and allowing the molding material to set to form a model; separating the test socket from the model and disengaging the casting anchor from the alignment member; (and) providing an adapter bracket having at least one through-hole adjacent the model and introducing the alignment member through the at least one through-hole in the adapter bracket and into engagement with the casting anchor to position the adapter bracket relative to the model". Based on the generic terminology used (i.e., "casting anchor"), and the limited disclosure concerning the structure and specific positioning of the casting anchor, undue experimentation would be required of one of ordinary skill in the art. Claim 10 requires "applying a socket forming material about at least a portion of the model and the adapter bracket". Based on the limited disclosure concerning the positioning of the socket forming material and a confusing illustration (the exploded perspective view of the apparatus and prosthetic device shown in Figure 20), undue experimentation would be required of one of ordinary skill in the art.
